

HDFC Bank - Annual Report FY2023-24

Executive Overview:

FY2024 marked the historic merger of parent entity HDFC Limited into HDFC Bank. The combined balance sheet expanded significantly, with total advances reaching Rs 24,84,000 crore. Capital Adequacy Ratio stood at 18.8%.

1. Credit Risk Management (FY2024):

Following merger integration of the mortgage book, Gross NPA stood at 1.24% in FY2024, and Net NPA was 0.33%. Provision Coverage Ratio (PCR) was 74.0%. Credit costs were proactively managed at 0.42%.

2. Liquidity and Market Risk (FY2024):

The average daily Liquidity Coverage Ratio (LCR) was 115%. Net Interest Margin (NIM) moderated to 3.63% due to high-cost wholesale liabilities of HDFC Limited being integrated onto the bank's books.
